# Results of analyzing IP: 172.16.235.2 computer
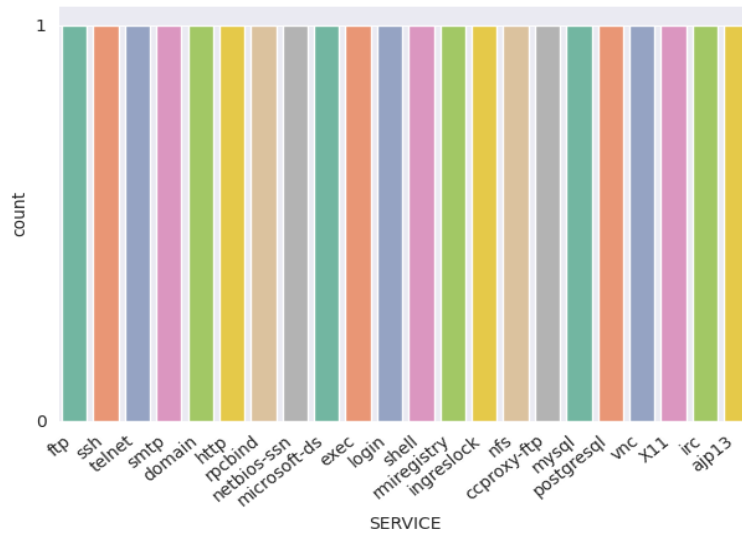

Auto-Nmap Analyzer

## King Saud University - SEC 505 project
12/04/2021

Current features include:

1. Collecting network data automatically

2. Analyzing the collected network data

3. Generate reports of the network status

4. Detect new discovered ports

5. Display warning message of the new detected ports

You have the following services running:

The state of running ports is shown below:

You have some ports open! try to close unnecessarily ports:

NO NEW PORTS DETECTED..

Thank You for using the service...

Cyber security team.
